Summary

Analytics leader experienced in turning large, fragmented datasets into enterprise dashboards, cost models, and data taxonomies, identifying multimillion-dollar savings opportunities for Fortune 500 clients across Energy, Telecom, and other industries. Skilled in Power BI, data governance, and scaling analytics capability across large, distributed teams in Deloitte and TCS.

Professional Experience

Senior Consultant, Supply Chain & Network Operations | Deloitte Consulting USI | Kolkata May, 2025 - Jan, 2026

- Led a multi-functional team of analysts to design and deliver **5 dashboards consolidating 100+ KPIs** into a unified reporting layer, giving leadership real-time, end-to-end visibility into business performance.
- Spearheaded a multi-year transactional data analysis project across a **\$180M spend category** to identify cost drivers and pricing benchmarks, surfacing **\$11M (6%) in savings opportunities** that informed category strategy.
- Designed and built an enterprise dashboard **consolidating \$12B of fragmented spend data** across business units, suppliers, and categories into a single source of truth, enabling stakeholders to **identify ~\$20M in savings opportunities**.
- Orchestrated the root cause analysis behind a large backlog of aging transactions, then built compliance-tracking dashboards that drove an **80% backlog reduction** and **\$5M in savings** across **80% of client sites in 8 months**.
- Identified a gap in offshore analytics capability and built a **100+ member community of practice** from scratch in **under 3 months**, **upskilling 30 members** to independently support Smart Operations engagements and reducing onshore dependency.

Consultant, Supply Chain & Network Operations | Deloitte Consulting USI | Kolkata Mar, 2022 - Apr, 2025

- Ran rapid data-driven assessments for two manufacturing clients to pinpoint operational bottlenecks, then **co-built an value-estimation model (OEE and profitability analytics)**, which was later adopted as a firm-wide analytics offering.
- Rebuilt fragmented, overlapping classification data into standardized, mutually exclusive taxonomies for a Fortune 500 energy client and a major CPG company, **unlocking multimillion-dollar savings visibility** in both engagements.
- Analyzed end-to-end operational data for a large automotive client to model lead-time drivers, cutting the **average fulfillment cycle by 20% to under 12 months**
- Built a risk-scoring dashboard analyzing historical demand and stock data for an automotive client, flagging **\$40M in potential understocking exposure** before it materialized.

IT Analyst | Tata Consultancy Services | Hyderabad Jan, 2017 - Mar, 2022

- Led a **4-member team to ship 12+ Power BI dashboards** for a Fortune 500 telecom client, hitting **100% on-time delivery**.
- Built 2 executive dashboards turning raw KPI data into clear insights for senior leadership.
- Translated client business questions into data models and dashboard specs, owning deployment end-to-end.
- Standardized the analytics requirements process, cutting **requirement gathering time by 30%**.
- Ran **knowledge-sharing sessions** and **contributed to proposals** for new analytics engagements.
- **Promoted 3 times in 5 years** for turning client data into high-impact insights.

Education

Bachelor of Technology – Maulana Abul Kalam Azad University of Technology, Kolkata | India 2012 - 2016

Accomplishments and Awards

- **Elected Secretary, Profile Committee (PGPX), IIM Ahmedabad** - led 15 members auditing 160 student profiles to ensure placement-readiness for the cohort
- **Received 6 awards at Deloitte:** 3 Applause Awards and 3 Spot Awards across strategic sourcing, spend analytics, smart manufacturing, and automotive supply chain engagements
- **Received the Special Initiative Award (TCS, 2022)** for delivering a critical Power BI dashboard within a tough deadline
